

Transforming Smiles: The Michael Baker Story

Nestled in the vibrant community of Golders Green, London, lies a clinic that's rewriting the script on dental care. At the Lotus Clinic, we don't just fix teeth; we transform lives- **Michael Baker's journey with us is a testament to that.**

Michael, a seasoned golf coach with a contagious smile, found himself at a crossroads. Years of globetrotting had **taken a toll on his dental health**. Despite his expertise on the green, he couldn't escape the constant visits to dentists across continents. His teeth, once a source of confidence, became a battleground for bacteria and decay.

But Michael's story took a remarkable turn when he walked through the doors of the Lotus Clinic. Under the expert care of implant surgeon Dr. Clozza, Michael embarked on a transformative journey—a journey that would redefine not just his smile, but his entire outlook on life.

Dr. Clozza recommended the **revolutionary All-on-4 dental technique**—a procedure that promises to restore a full set of upper and lower teeth in just one day. For Michael, this wasn't just a dental procedure; it was a lifeline.

"I've spent a fortune on my teeth over the years," Michael recalls. "But it was always a temporary fix. The All-on-4 technique offered a permanent solution—one that would change everything."

From the moment Michael stepped into the clinic, he knew he was in good hands. The team at Lotus Clinic, led by Dr. Michael Frankl, **guided him through every step of the process with warmth and expertise.** Preparing for the procedure was a breeze, thanks to

personalised care and medication tailored to his needs.

*"The support I received from Dr. Clozza and the dental nurses was second to none," Michael shares. **"They made sure I was comfortable every step of the way."***

The day of the procedure arrived, and Michael felt a mix of excitement and nervous anticipation. But as Dr. Clozza administered the local anaesthesia and medication to relax him, Michael felt at ease. The All-on-4 technique, with its precise placement of implants, promised not just functionality but aesthetics that would rival natural teeth.

"The temporaries were good enough to be the real ones," Michael recounts. "And once I healed, I could come back for minor adjustments to ensure they looked and felt just right."

The transformation was nothing short of miraculous. **With his new set of teeth, Michael rediscovered the joy of smiling**—confidently, unapologetically. *"It's not just about aesthetics," he emphasises. **"It's about confidence, wellbeing, and esteem."***

Gone were the days of chewing cautiously, avoiding his back teeth like a rodent. With his new smile, Michael embraced the simple pleasures of savouring each bite, chewing fully, and relishing the flavours.

"I used to rush through meals, treating them as inconveniences," Michael reflects. "Now, I take the time to enjoy every bite, thanks to my new teeth."

But Michael's journey didn't end with the procedure. He became an advocate for Lotus Clinic, spreading the word to friends and family. *"People often ask me where I got my teeth done," he says with a grin. "And I proudly tell them: **right here, with Dr. Clozza and the team at Lotus Clinic.**"*

For Michael, investing in his smile was an investment in himself—a decision he'll never regret. *"Some may splurge on material possessions," he muses. "But for me, **this transformation was priceless.**"*

At Lotus Clinic, we're more than just dentists. We're architects of confidence, sculptors of smiles, and guardians of wellbeing. Join us on a journey to rediscover the power of your smile.

With the All-on-4 technique, anything is possible—and your best smile awaits!
